

Altiris® 6

Connector for PeopleSoft

INTEGRATING ALTIRIS WITH PEOPLESOFT
ENTERPRISE IT ASSET MANAGEMENT

The Altiris® Connector for PeopleSoft provides out-of-box integration with PeopleSoft Enterprise IT Asset Management to enable IT organizations to discover, track, and monitor usage of all IT assets. The connector provides efficient, one-way data transfer of Altiris Inventory Solution® and Application Metering Solution™ data into the PeopleSoft Enterprise IT Asset Management repository.

BENEFITS

- > Automatically export comprehensive inventory data
- > Export application metering and usage data
- > Access Altiris Console through PeopleSoft Enterprise IT Asset Management
- > Access additional Altiris management solutions

EXTENDING PEOPLESOFT ENTERPRISE IT ASSET MANAGEMENT

The Connector for PeopleSoft provides seamless integration that extends and enhances PeopleSoft Enterprise IT Asset Management. The complementary strengths of Altiris and PeopleSoft solutions help organizations gain control of IT assets and costs, comply with software license agreements, optimize IT investments, and reconcile IT asset information with PeopleSoft Financials data.

SEAMLESS INTEGRATION

The Connector for PeopleSoft automatically integrates the PeopleSoft Foundation Suite by Altiris and PeopleSoft Enterprise IT Asset Management. The PeopleSoft Foundation Suite includes these Altiris solutions:

- > Altiris Inventory Solution for Clients
- > Altiris Inventory Solution for Handhelds
- > Altiris Inventory Solution for Servers
- > Altiris Connector Solution
- > Altiris Connector for PeopleSoft

With the PeopleSoft Foundation Suite, IT organizations gain a 360 degree view of hardware and software, ensure compliance with software license agreements, and take advantage of reallocation and retirement of unused licenses.

KEEP IT CLEAN—AUTOMATICALLY

The scheduling capabilities of The Connector for PeopleSoft allow you to regularly and automatically sync data, from the Altiris® Notification Server™ to PeopleSoft Enterprise IT Asset Management, so there's no guesswork in determining whether data is current and accurate—with the Connector for PeopleSoft it is.

The Connector for PeopleSoft allows you to:

- > Automatically export comprehensive inventory data for clients, servers, handhelds, network devices, and applications
- > Export application metering and usage data
- > Access the Altiris console through PeopleSoft Enterprise IT Asset Management
- > Access additional Altiris management solutions through the Altiris Notification Server if additional solutions are purchased and installed)

TRACK DATA TRANSFERS WITH REPORTS

The Connector for PeopleSoft provides you with reporting capabilities so you can view results such as the details of data transfers, resource counts, row counts, and transfer times and dates.
