

Altiris® 6

Connector for Microsoft SMS 2003

.....
 EXTEND AND MANAGE SMS NATIVELY WITH ALTIRIS FUNCTIONALITY

BENEFITS

Altiris complements Microsoft SMS by providing:

- > System deployment
- > PC migration
- > Mobile backup and recovery
- > Support for UNIX, Linux, Macintosh, Pocket PC and Palm
- > Extended software and hardware asset management capabilities
- > Application packaging and conflict analysis
- > Vulnerability audit
- > System security audit and compliance
- > Software virtualization
- > Help desk

The Altiris® Connector for Microsoft SMS 2003 allows you to extend the functionality of Altiris solutions to integrate with and leverage Microsoft Systems Management Server 2003. Use the connector to send Altiris Notification Server™ inventory data to Microsoft SMS 2003, then use your Altiris solutions to extend and enhance your Microsoft SMS 2003 infrastructure and more fully manage your enterprise.

THE FIRST TO PROVIDE INTEGRATION

Since Microsoft SMS 1.0, Altiris has developed solutions that natively integrate with Microsoft management technologies, extending their reach to the enterprise with complementary functions and support. In fact, Altiris was the first vendor to provide native integration with Microsoft SMS 1.0. Today, Altiris offers more than 20 solutions with functions that add value to Microsoft SMS 2003, such as full asset management and client recovery. The Connector for Microsoft SMS 2003 provides an integrated Web console and native integration for Microsoft SMS 2003, including older versions of Windows and non-Windows platforms, including Linux, UNIX, Macintosh, Palm, and network devices. Now it's easy to combine your Microsoft SMS 2003 infrastructure with Altiris solutions, providing your organization with comprehensive enterprise management.

MANAGE YOUR MICROSOFT SMS DATA EASILY

The Connector for Microsoft SMS 2003 allows you to send Altiris Inventory data to an SMS server and then replicate collections and packages from Microsoft SMS to Altiris. The connector provides complementary IT management functions for migration, deployment, asset management, backup and recovery, reporting, packaging, and problem resolution. From the SMS Administrator (MMC) console, you tackle pain points and extend and manage Microsoft SMS natively with Altiris functionality. For example:

- > Mass system deployment, including cloning, imaging and computer configuration
- > PC personality migration
- > Mobile and remote user support, including inventory and software distribution

- > UNIX management from Microsoft SMS 2003, including inventory and software delivery
- > Comprehensive asset management, including fixed asset, and lease and contract tracking
- > Enhanced PC inventory, including serial number support, Exchange profile in Microsoft SMS 2003 and data normalization
- > Web-based help desk and problem resolution support

ALTIRIS PROVIDES OVERALL VISIBILITY

Altiris Connector Solution™ is the base component for all Altiris connector packs—including the Connector for Microsoft SMS 2003—and provides you with the ability to create connections to your other business systems. You must also purchase Connector Solution when you purchase the Connector for Microsoft SMS.

Connector Solution integrates Altiris solutions with your organization's third-party systems. Use Connector Solution to leverage user and organizational data from your HR system, cost information from your financial system, and other pertinent data from your critical business systems. The solution is a powerful way to connect information systems, giving you overall visibility into your organization.

ALTIRIS SOLUTIONS: EXTENDING THE REACH OF MICROSOFT TECHNOLOGIES

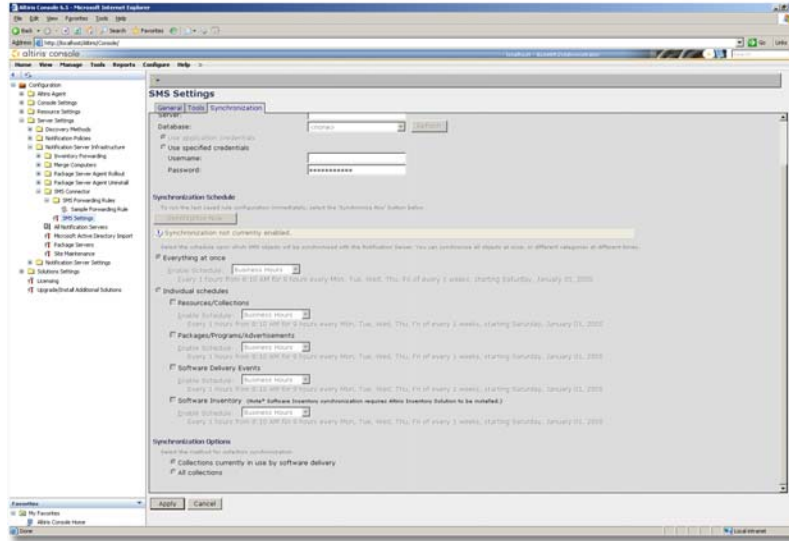

Altiris solutions accelerate the deployment of Windows operating systems and applications, reduce the cost of migration, and enable the Windows environment to be the best and most securely managed operating environment in the world. No one extends the reach of Microsoft technologies better than Altiris.
