

Altiris® 6

Connector for HP Systems Insight Manager

.....
 CONSOLIDATING HP CLIENT AND SERVER SYSTEMS MANAGEMENT

The Altiris® Connector for HP Systems Insight Manager allows IT professionals to consolidate deployment and management of HP clients and servers within a single HP Systems Insight Manager* console. The connector extends HP Systems Insight Manager core functionality with client deployment, HP client hardware management, and access to additional Altiris lifecycle management functionality.

BENEFITS

- > Extend HP Systems Insight Manager by integrating client hardware and software management through a familiar console, menu, and database
- > Integrates HP Client Manager Software and Altiris deployment functionality from within the HP Systems Insight Manager console, which allows you to:
 - view hardware inventory detail and reports
 - monitor health and in-depth diagnostic reports for HP clients
 - update BIOS and system software
 - deploy new client systems through an integrated deployment wizard
- > Access complete client IT lifecycle management tasks through menu links to the Altiris Console and functionality

EXTENDING HP SYSTEMS INSIGHT MANAGER

The Altiris Connector for HP Systems Insight Manager provides tight menu and database level integration between the HP Systems Insight Manager console and Altiris management console. With menu and database level integration points, the Connector allows HP Systems Insight Manager users to extend systems management beyond the server hardware management provided by HP Systems Insight Manager to include comprehensive client management for HP customers. IT professionals who are comfortable using the HP Systems Insight Manager console will appreciate managing both clients and servers using one console to discover, monitor, and perform systems management tasks on HP clients and servers. This consolidated approach enables the IT staff previously trained on HP Systems Insight Manager to also manage HP clients from the same console to further reduce the costs of owning HP hardware.

INTEGRATING ALTIRIS AND HP SOLUTIONS

Altiris extends HP Systems Insight Manager by providing integration to its comprehensive IT lifecycle management solutions for client, mobile, and asset management. HP and Altiris work closely together to co-develop and provide seamless integration for managing HP client hardware with HP Client Manager Software. HP Client Manager Software, together with Altiris® Client Management Suite™, provides HP customers with a comprehensive strategy and technology for managing all client computers within their enterprise. Client Management Suite extends client hardware management by providing additional software inventory, patch management, software delivery, remote control, and backup and recovery. Altiris® Asset Management Suite™ comprehensively manages both discoverable and non-discoverable assets with their associated relationships, contracts

and costs. Together, HP and Altiris provide an integrated set of solutions to manage HP clients and servers as well as other platforms and assets.

REDUCE COST OF OWNING HP CLIENT COMPUTERS

The integration of HP Client Manager Software leverages Altiris systems management technologies to manage HP desktops, notebooks, and workstations, ultimately reducing the cost of owning HP client computers. Tracking hardware assets throughout an enterprise, keeping system drivers current, changing BIOS settings and diagnosing hardware issues can be challenging task. HP Client Manager Software remotely manages HP client computers and reduces the time and cost of identifying and fixing problems manually. HP Client Manager Software is available for free from www.altiris.com.

The Connector for HP Systems Insight Manager provides these additional benefits:

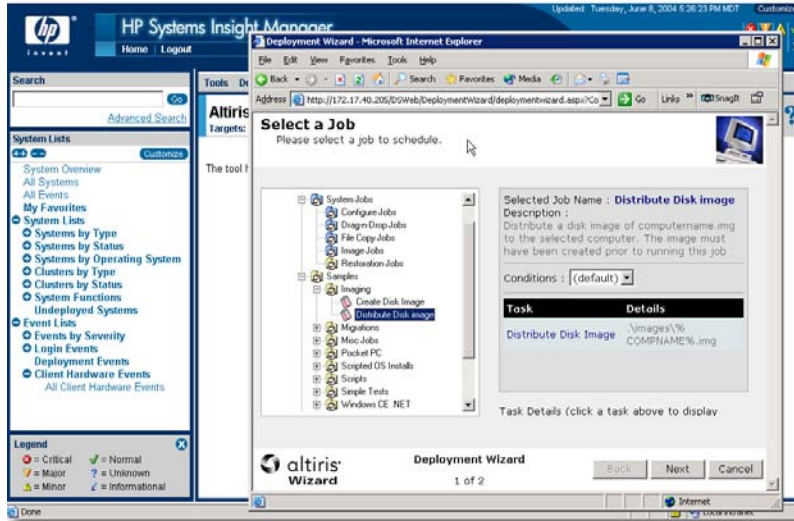

- > Improve IT staff productivity by allowing IT managers to perform key server and client management tasks from a familiar console
- > Reduce visits to remote desktops and travel to remote locations by centralizing systems management
- > Keep systems up-to-date and running efficiently to maximize user productivity
- > Centrally manage both the software and hardware tasks for HP client computers
- > Manage the complete IT lifecycle of HP client computers from cradle to grave
- > Extended support to manage heterogeneous client and server platforms
- > Integrate with broader HP enterprise technology and Altiris systems management solutions

IT professionals benefit from a consolidated view of their HP servers and clients with HP Systems Insight Manager. Use the Altiris Connector for HP Systems Insight Manager to access client hardware and software and maximize Altiris IT lifecycle management functionality.

Tight integration allows client computers to be selected in HP Systems Insight Manager and then through menu integration, deploy a new image to the selected client computers using the Altiris Deployment Wizard.

Through integration with HP Client Manager Software, you can manage the hardware aspects of HP clients, including updating their systems software using HP SoftPaqs through the SoftPaq Delivery Wizard.
